INVESTMENT OBJECTIVE: GROWTH

March 2022

This portfolio is designed for clients who wish to invest for long-term capital appreciation and are happy with a higher than market level of volatility at times. It will invest globally in equity funds but with a UK bias as this reduces the impact of movements in the exchange rate. The choice of funds will be based around a robust investment framework to ensure there is balance and diversification within the model. There will be high levels of overseas exposure and with the potentially higher return nature of these investments volatility will be higher also.

CUMULATIVE PAST PERFORMANCE (%)

Past performance is not indicative of future performance. The value of shares and the income from them can fall as well as rise and investors may get back less than the amount invested.

Please note:

The chart above shows the performance of the Growth Model from 30 Nov 2011 when the model launched. Accordingly, this live data shows how the model performed taking into account any changes to the model, and any underlying fund charges, but excludes Rowan Dartington management and administration fees.

Data from 1 month through to 5 years is cumulative (%), after which data from 2017 to 2021 is discrete (%). The cumulative periods are for the period stated, for example 3m, up until the most recent date as shown on the chart. The discrete periods are calendar years.

The 12 month discrete performance periods are to the last quarter end.

The benchmark selected is the one most suitable for this model's asset allocation.

All past performance information is on a bid to bid basis in pounds sterling.

INVESTMENT OUTLOOK

On 24th February, Russia launched a full-scale invasion of Ukraine, escalating the conflict that started with the 2014 annexation of Crimea. Despite a build-up of Russian military activity along the Ukrainian border, the attack came as a surprise to many who had previously deemed it an act of Russian posturing. The invasion has been widely condemned by the international community, with wide-ranging sanctions placed on Russian activity, industries, and individuals. Equity market reaction has been volatile, although returns since Putin’s intentions became fully apparent have been relatively flat, following a period of decline as markets have weighed the likelihood of accelerated rate hikes from the US Federal Reserve and other central banks in the face of high and persistent inflation. The price of oil surged as traders feared a squeeze on global supply; Russian oil exports account for approximately eight percent of global oil supply, meaning any disruption to deliveries could have profound implications for the world economy. In the long term any growth of capital will come via an orientation towards the areas of greatest opportunity, which is where valuations look most attractive and where we aim to position the portfolio.

ASSET, GEOGRAPHIC & RISK ALLOCATION

Please note:

The risk gauge is a graphical representation of the portfolio's risk weighting for illustrative purposes only.

*OCF definition

The Ongoing Charges Figure (OCF), Transaction and Incidental costs are those relating to investments made and held on the Rowan Dartington platform. If you are investing via an alternative third-party platform, the OCF and other costs may be different and will depend on the types of units (retail or institutional, for example) that can be accessed via that third party platform. Rowan Dartington cannot be held responsible for any changes in the published OCF or other costs when using a third party platform.

** Portfolio yield gives an indication of the current level of income which is expected to be distributed over the coming 12 months. This is based on the current holdings within the portfolio, and after the deduction of the investment funds’ annual management charges – it is gross of basic rate tax. It excludes the annual Rowan Dartington management charge.

#The Ongoing Charges Figure (OCF) relates to the fund AMC, custody and other associated charges applied by the underlying funds. The total charge comprises of our management fee, administration fee and fund OCFs. In addition to OCF, there may be Transaction & Incidental costs.

GENERAL RISKS

The past performance is not a reliable guide to future performance. The value of shares and the income from them can fall as well as rise and investors may get back less than they originally invested. The tax treatment of investments depends on each individual's circumstances and is subject to changes in tax legislation. The sterling value of overseas investments, and the income from them, is subject to currency fluctuations. All estimates and prospective figures quoted in this publication are forecast and are not guaranteed.

SPECIFIC RISKS

Bond: The fund holds bonds issued by companies and governments. There is a chance that some of the companies and government that issue the bonds will fail to make interest or capital payments or other investors may believe the security of the government or company has declined, both of which would reduce the value of your investments. The value of bonds are also sensitive to change in interest rates, for an example, an increase in interest rates may cause a fall in the value of an investment in bonds.

Equity: The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. Consequently, the value of equities can rise and fall sharply at times and returns aren't guaranteed.

Emerging markets: This fund holds investments in less developed economies and invests in less mature stock markets, so its value may fluctuate more than a fund which invests in developed countries.

Property: This fund invests mainly in property (i.e. land and buildings). Property can be difficult to sell in a short period, so you may not be able to sell or switch out of the investment when you want to due to the delay in acting upon the instruction. The value of property can fall as well as rise, particularly if there are more people trying to sell rather than buy, and is generally a matter of a valuers opinion until the property is sold.

IMPORTANT INFORMATION
